# A Massage Marvel

with Engineering Extraordinaire

The all-new **ITSU Sensei Inspire**,  
a masterpiece of the ITSU Sensei Master Series

Inspired by the world's luxurious supercars, ITSU Sensei Inspire combines the streamlined aerodynamic design with ergonomic seating comfort to deliver the ultimate professional massage experience. With just a push of the button and the roaring sound of ignition will excite your senses for an exhilarating ride of relaxation.

FIRST OF ITS KIND!  
**The Trailblazing Fitness Tracker for Real-Time Health Analysis**

AI  
TECHNOLOGY

Meet ITSU Smart Band, the first-of-its-kind personal fitness tracker powered by ITSU advanced AI technology. Simply download the ITSU WORLD app on your smartphone and let ITSU Smart Band analyse your health data and day-to-day body activity to customise the perfect massage therapy.

Based on the collected data, ITSU Smart Band will recommend 1-4 personalised massage programmes with higher precision and efficiency to relieve pain and fatigue, giving your mind and body a well-deserved recharge.

**ITSU Sensei Inspire**  
**HOW IT WORKS**

Once you put on your ITSU Smart Band, the FlagFit 2.0 app will be activated to record and monitor your activity and health data. Then, use the ITSU WORLD app to pair with ITSU Sensei Inspire and ITSU Smart Band via Bluetooth to generate automatic recommendation of the most suitable massage programme.

Compatible with: iOS 13 / Android 10 via Bluetooth 4.0

Connect ITSU Smart Band via Bluetooth.

FlagFit 2.0

The complementary app for ITSU Smart Band designed to record and monitor your activity and health data.

ITSU WORLD

Use this app to connect ITSU Sensei Inspire with ITSU Smart Band which will utilise the health data to initiate and customise the most suitable massage programme.

Recommendation of 1-4 personalised massage programmes

SELECTIONS

The Absolute Breakthrough!

# Quattro Mechanism

The latest functionality upgrade for the ultimate full-body enjoyment! ITSU Sensei Inspire's brand new Quattro rollers are programmed using ergonomics and AI technology to achieve a seamless performance. As such, this enables various massage techniques being applied simultaneously without any interference, delivering an unmatched massage experience like no other. The rollers are equipped with 22 body sensors to deliver a more thorough massage sensation in a more dynamic rhythm – all along the 1.38-metre long massage track for a wider massage range.

The Quattro rollers are now capable of performing a 13.5cm of roller ejection. Through the ultra-precise motorised transmission technology, the rollers are now able to shift between 12-speed adjustable massage intensities in just 0.5 seconds, combining the encapsulating warmth to heighten the relaxing sensation while accurately targeting the soreness. The result, an in-depth muscle decompression that leaves the body invigorated and relieved from stress and fatigue.

**Quattro Rollers**  
More thorough, more dynamic massages

**22 Body Sensors**

**1.38m Massage Track Length**  
For more extensive massage range

**13.5cm Roller Ejection**  
Ultra-precise massage sensation

**12-speed adjustable intensity**  
Seamless transition in 0.5 seconds for uninterrupted relaxation

**Touchscreen Navigation**  
Intuitive and minimalist design with supercar-inspired elements

**Easy-to-use Remote Control**

# 45 Massages

## All Automatic, All Yours

ITSU Sensei Inspire is programmed with 45 automatic massages to give the complete care and comfort you truly deserved – from head to toe. Combining the humanistic massage methods and techniques, ITSU Sensei Inspire gives you the unparalleled immersive massage experience.

Focusing on 5 main body regions – neck, shoulders, back, hips and glutes – each is paired with 9 massage techniques, and hence the 45 automatic massages.

At the same time, 68 airbags are distributed all over the body, focusing on the back, arms, glutes and legs, which are complemented by 4 massage techniques that operate with 16 airbags respectively.

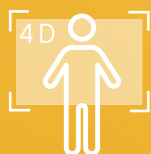

### 45 Automatic Massage Programmes:

### Smart Scan Detection & Analysis

Using the state-of-the-art analytic technology to accurately identify the needs of different body types and adjust to individual spinal curvatures for the best-fitting massage experience.

### 4 Detection Methods:

- Roller-tap scanning
- Variable roller-swipe scanning
- 4D scanning
- 4D variable-width scanning

### 3 Adjustable Shoulder Heights & Widths

Set the shoulder height and width in 3 adjustable positionings for a more close-fitting massage sensation.

### Dual-Level Heat Massage

Feel the therapeutic comfort of heat massages on the shoulders, glutes, arms, legs and feet, designed to promote blood circulation and relieve cold hands and feet.

### Hand Reflexology Massage

Stimulates the acupressure points on the hands to target the specific organ functions while promoting blood circulation for general health improvements.

### Leg & Foot Reflexology Massage

Using airbags at variable pressure to simulate the human touch on the legs and feet.

- Inner calf massage
- Lateral calf kneading massage
- Foot Gua Sha
- Foot tapping

### Roller Massage for the Palms & Soles

### Bluetooth Speakers

Simply pair your device and indulge in your favourite music while enjoying the relaxing massages.

### Quick-Touch Buttons

### 4 Language Options

Available in English, Malay, Chinese and Japanese.

### Wireless Charging

### Anti-Trap Backrest

### Space-Saving Design

Featuring the intelligent front-slide reclination that requires only 4cm of space from the wall, perfect for compact living areas.

## All-Rounder Functionality

## For The All-Over Relaxation
